

Business Continuity and Disaster Recovery (BC/DR)

Policy Owner: Alejandro De La Torre

Effective Date: July 2, 2025

Purpose

The purpose of this business continuity plan is to prepare dmnd.work in the event of extended service outages caused by factors beyond our control (e.g., natural disasters, man-made events), and to restore services to the widest extent possible in a minimum time frame.

Scope

All dmnd.work IT systems that are business critical. This policy applies to all employees of dmnd.work and to all relevant external parties, including but not limited to dmnd.work consultants and contractors.

1. Policy

In the event of a major disruption to production services and a disaster affecting the availability and/or security of the dmnd.work office, senior managers and executive staff shall determine mitigation actions.

A disaster recovery test, including a test of backup restoration processes, shall be performed on an annual basis.

Continuity of information security shall be considered along with operational continuity.

In the case of an information security event or incident, refer to the Incident Response Plan.

2. Alternate Work Facilities

If the dmnd.work office becomes unavailable due to a disaster, all staff shall work remotely from their homes or any safe location.

3. Communications and Escalation

Executive staff and senior managers should be notified of any disaster affecting dmnd.work facilities or operations.

Communications shall take place over any available regular channels including ; Slack Channels, Zoom meetings, or email communications.

Key contacts shall be maintained on the on-call schedule and key contacts

Roles and Responsibilities

Role	Responsibility
IT Manager	The IT Manager shall lead BC/DR efforts to mitigate losses and recover the corporate network and information systems.
Departmental Heads	Each department head shall be responsible for communications with their departmental staff and any actions needed to maintain continuity of their business functions. Departmental heads shall communicate regularly with executive staff and the IT Manager.
Managers	Managers shall be responsible for communicating with their direct reports and providing any needed assistance for staff to continue working from alternative locations.
VP of Global Support	The VP of Global Support, in conjunction with the CEO and CFO shall be responsible for any external and client communications regarding any disaster or business continuity actions that are relevant to customers and third parties.
VP of Engineering	The VP of Engineering, in conjunction with the VP of Global Support, shall be responsible for leading efforts to maintain continuity of dmnd.work services to customers during a disaster.
Chief HR Officer	The CHRO shall be responsible for internal communications to employees as well as any action needed to maintain physical health and safety of the workforce. The CHRO shall work with the IT Manager to ensure continuity of physical security at the dmnd.work office.

4. Continuity of Critical Services

Procedures for maintaining continuity of critical services in a disaster can be found in Appendix A.

Strategy for maintaining continuity of services can be seen in the following table:

KEY BUSINESS PROCESS	CONTINUITY STRATEGY
Customer (Production) Service Delivery	Rely on Amazon Web Services (AWS) availability commitments and SLAs
IT Operations	Not dependent on HQ. VPN is redundant between HQ and Colo. Critical data is backed up to alternate locations.
Email	Utilize Google Workspace and its distributed nature, and rely on Google's standard service level agreements.
Finance, Legal and HR	All systems are vendor-hosted SaaS applications.
Sales and Marketing	All systems are vendor-hosted SaaS applications.

Plan Activation

This BC/DR shall be automatically activated in the event of the loss or unavailability of the dmnd.work office, or a natural disaster (i.e., severe weather, regional power outage, earthquake) affecting the larger UK/EU region.

Appendix A – Business Continuity Procedures by Scenario

Business Continuity Scenarios

Hosting Provider Outage

- Contact On Call Engineers, CTO, and Engineering managers
- Contact <Hosting Provider Name>'s support team to obtain details
- Verify the components the outage impacts (All components, databases, servers, etc)
- Publish application status on status page or send mass communication to customers with an estimated timeline on recovery
- Communicate outage status with internal employees

Internal Tool Outages (Email, Slack, Conference Tools)

- Contact SaaS providers and obtain details on estimated recovery time.
- Communicate outage details to employees
- Confirm impact to customer data and operations that may impact customers
- Communicate outage details to customers with estimated recovery time if the outage impacts customers

Physical / Environmental Disasters

- Communicate outage details to employees
- Offer alternative work options (remote, shared workspace, etc)
- Verify teams have necessary equipment to perform job duties
- Communicate details to customers if the disaster impacts customer meetings
- Schedule remote calls in place of in -person meetings.
